THE ANDOVER PRESS

The 1922 Cauldron aims to set down the events of a peaceful college year in a period of world reconstruction, to record those happenings which have blended our spirit and our devotion into a high idealism for our Alma Mater, Portheastern.

JOHN BUTLER PUGSLEY

To

John Butler Pugsley,

Our Faithful Friend and Advisor,

The inspiration of whose efforts and councils has been felt by everyone in our College, we loyally and affectionately dedicate this volume.

John Butler Pugsley

John Butler Pugsley, registrar of the School of Engineering, Northeastern College, first saw the light of day November 21, 1882, at Somersworth, New Hampshire.

In his childhood days, he attended Chandler Grammar School and later the Somersworth High School. He enrolled at Colby College, Waterville, Maine, in 1901, graduating in 1905 with the A. B. degree. While at College, he majored in mathematics and science. Along athletic lines, he had the distinction of being a three letter man, excelling in baseball, basketball, and football, being captain of the varsity baseball team in 1905 and captain of the varsity football team in 1903 and 1904. During his senior year, he was honored by election as class president. At the same time he was an active member of the Zeta Psi Fraternity, one of the oldest college fraternities in the country.

During the summer following his graduation, Professor Pugsley attended Columbia Summer School, New York City, taking courses in School Administration. From there he entered his professional career, educational work. From September, 1905 to February, 1918, he was principal of a number of high schools in New England. From then until the fall of 1918, he was Athletic Officer in the Twenty-sixth Division, A. E. F., in France.

Directly upon his return from France, Professor Pugsley entered the School of Engineering, Northeastern College, as an instructor in mathematics and chemistry. During the following year, the College had grown by such leaps and bounds that Dean Ell found himself overwhelmed with work. It was necessary to appoint a capable man to assume partial responsibility. Due to Professor Pugsley's invaluable experience derived while serving young men both in civil and military life, he received the assignment in the winter of 1919 of registrar, a position he has filled with unusual success.

The manner in which Professor Pugsley has handled the hundred and one odd questions, relative to all phases of college life and college activities, has ranked him as one of the foremost and conspicuous figures of the School of Engineering. His pleasing personality, his unselfish attitude, his impartiality shown in the numerous college activities, these characteristics have made him popular among the upper and lower classmen. Moreover, these striking qualities have created a lasting impression upon the alumni who, when memories of their college days return, cannot help but recall the untiring efforts of Professor Pugsley to place the School of Engineering of Northeastern College in a position among the best engineering colleges in the country.

Frank Palmer Speare, M. H., L.L. B. President of Northeastern University

Frank Palmer Speare, President of Northeastern University, was educated in the Boston Public Schools, Chauncy Hall School, Bridgewater State Normal School and Harvard University. Upon graduation he entered High School principalship. Later, in 1895, he was appointed Director of Education for the Boston Young Men's Christian Association, which position he held until the department was incorporated as Northeastern College in 1916, when he was elected president. He established the Co-Operative Engineering School in 1909.

He is a member of numerous important educational and fraternal organizations.

FACULTY

CARL STEPHENS ELL, A. B., S. B., M. S.

Dean of Northeastern College, School of Engineering.

DePauw University, 1909, A. B.; Massachusetts Institute of Technology, 1911, S. B., 1912, M. S.

Assistant Engineer to E. B. Phelps, Consulting Engineer, Boston and New York, 1912; Assistant Inspecting Engineer, New York State Department of Health, Summers of 1911 and 1914; Assistant to Deputy Commissioner of Health of the New York State Department of Health, Summer of 1917; Head of the Civil Engineering Department of the Northeastern Engineering School, 1912 to 1917; Dean of the Engineering School, 1917.

WINTHROP ELIOT NIGHTINGALE, A. B., S. B.

Director of Engineering Practice. Professor of Civil Engineering.

Harvard University, 1915, A. B., Massachusetts Institute of Technology and Harvard University, 1918, S. B.

United States Coast and Geodetic Survey. 1915-1916; Resident Engineer, Massachusetts Highway Commission, 1916-1917; Massachusetts Institute of Technology. 1917-1918; Ensign, Naval Air Service, 1918-1919; Resident Engineer, Lockwood, Greene & Company, Engineers, 1919-1920; Northeastern College, 1921.

"Nothing doing today, come around tomorrow."

JOSEPH SPEAR, A. B.

Professor of Mathematics. Director of Student Activities. Harvard University, 1913, A. B.

Instructor of Mathematics and German, University of Maine, 1913–1915; Lieutenant U. S. Field Artillery, 1917–1919; Northeastern College, 1919.

"F'rinstance, take this,--"

Galen David Light, A. B.
Secretary-bursar, Northeastern College.
Lebanon Valley College, Yale University.

Assistant Educational Director Y. M. C. A. since graduation; Secretary-bursar of the College since its incorporation

Henry Bissell Alvord, S. B. Professor of Civil Engineering.

Massachusetts Institute of Technology, 1907, S. B.

Assistant in Civil Engineering, M. I. T., 1907–1910; Instructor and Assistant Professor of Civil Engineering, Bowdoin College, 1910–1914; Aberthaw Construction Company, 1914–1917; Secretary, American Concrete Institute, 1917–1919; Instructor, Wentworth Institute, 1919–1920; Northeastern College, 1920.

"Well, are you sure about that?"

George Francis Ashley.

Professor of Drawing.

Massachusetts Institute of Technology, 1897-1900

Instructor and Assistant Professor of Technical Drawing and Descriptive Geometry, Tufts College, 1900–1917; Instructor of Desctiptive Geometry at Harvard, 1909; Sanborn Gauge Company, 1917–1918, Northeastern College, 1918.

"Now see here, you're wasting your time."

Chester Packard Baker, B. Ch. E.
Instructor of Chemical Engineering.
Northeastern College, School of Engineering,
1920, B. Ch. E.

Analytical Chemist, Werby Laboratories, 1917–1918. Assistant Instructor of Chemistry, Northeastern College, 1919–1920. Special Courses, Massachusetts Institute of Technology, 1920–1921.

"Now let's see,"

Percy Francis Benedict, S. B.
Assistant Professor of Administrative Engineering.
Massachusetts Institute of Technology, 1914, S.B.

United States Coast and Geodetic Survey in Alaska, 1914–1917; Mechanical Engineering Department, W. H. McElwain Company, Shoe Manufacturers, Manchester, N. H., 1917–1918; Nortneastern College, 1918

"Just a little mathematical ingenuity."

Joseph Arthur Coolidge, S. B. Professor of Physics.

Harvard University, 1910, S. B.

Head of Mathematics Department, Co-operative Engineering School, Northeastern College, 1910-1919; Head of Physics Department, 1920,

"Correct to four places,"

Pearl Whitefield Durkee, A. B., S. B. Professor of Electrical Measurements.

Acadia University, 1903, A. B.; McGill University, 1906, S. B.; Graduate Course in Mathematics and Physics, University of Chicago, 1916–1918.

Instructor of Mathematics and Graphics, Lafayette College, 1909-1910; Professor of Electrical Engineering, Acadia University, 1910-1912; Hydro-Electric Engineering, Colgan Power Company, 1912-1914; Assistant Professor of Physics, Ohio Wesleyan University, 1914-1917; Northeastern College, 1917.

"I suspect it's like this."

Alfred John Ferretti, S. B.
Assistant Professor of Mechanical Engineering.
Mass. Institute of Technology, 1917, S. B.

Assistant Instructor of Mechanical Engineering and Instructor in Merchant Marine School, Massachusetts Institute of Technology; Instructor Machine Construction, Franklin Union, 1917–1919; Northeastern College, 1918.

"This being the ease,"—

George Blodgett Gee, C. E.
Assistant Professor of Drawing.
Ohio Northern University, 1914, C. E.

Assistant City Engineer, Ada, Ohio, 1915; Assistant Engineer, Truscon Steel Company, 1915-1918; Northeastern College, 1918.

"So much for that."

Maurice Elmer Goodridge, S. B.

Assistant Director of Engineering Practice and
Instructor of Administrative Engineering.

Mass. Institute of Technology, 1919, S. B.

United States Army Engineer Replacement, 1918; Boston Rubber Shoe Co., Planning Department, 1918–1920; L. Candee & Co., New Haven, Conn., Development Engineer, 1920–1921; Northeastern College, 1921.

"Goodness sakes, wake up!"

Emil Anton Gramstorff, S. B. Instructor of Mathematics and Drawing. Mass. Institute of Technology, 1917, S. B.

Lieutenant, Construction Corps, United States Navy, 1917–1920; Refrigeration Construction, 1920–1921; Northeastern College, 1921.

"Oh! H--"

JAMES WARREN INGALLS, B. S., C. E.

Dartmouth College, 1910, B. S.; Thayer School of Civil Engineering, 1911, C. E.

Assistant to City Engineer, Barre, Vt., 1910-1911; Junior Topographer, United States Geological Survey, Montpelier, Idaho, 1911; Draftsman, J. P. Snow, Consulting Bridge Engineer, Boston, 1911-1912; Instrumentman, Southern New England Railroad, Brimfield, Mass., 1912; Track Supervisor, Ponce and Guayama Railroad, Porto Rico, 1913; Resident Engineer, Maine Central Railroad, 1913-1918; Mail Order Business, 1919-1921; Northeastern College, 1921.

"Now follow me rather closely on this."

Madison Peters Jeffrey, A. B.
Instructor of English.
Tufts College, 1919, A. B.

Athletic Officer, Pensacola, Florida, U. S. Naval Air Station, 1917–1918; U. S. Naval Air Service, 1917–1919; Instructor of English, Wagner School, 1919–1920; Northeastern College, 1921.

"You eertainly could!"

Harold Wesley Melvin, A. B.Assistant Professor of English.Boston University, 1915, A. B.

Principal of New Marlboro High School, 1915–1916; Instructor in English, Brewster Academy, Wolfeboro, N. H., 1916–1920; Northeastern College, 1920.

"We'll have a little test today."

EARNEST FRED PERKINS, S. B., M. S. Instructor of Chemical Engineering.

Mass. Institute of Technology, 1919, S. B.; 1920, M. S.

Assistant Instructor of Chemistry, Massachusetts Institute of Technology, 1920; Metallurgist, plant No. 2, Oliver Chill Plow Works, South Bend, Indiana; Northeastern College, 1921.

"I don't know, I'll look it up."

ROLAND GUYER PORTER, B. E. E. Instructor of Electrical Engineering.

Northeastern College, School of Engineering, 1918, B. E. E.

Commercial Operator at Sea, Marconi Company, 1913–1915; Edison Electric Illuminating Co., Boston, t915–1916; Ensign, U. S. N. R. F., Instructor in Radio Theory and Editor U. S. Navy Radio Theory Text, 1918–1919; Northeastern College, 1919.

"Now, men,--"

HENRY EDWARD RICHARDS, S. B. Instructor of Electrical Engineering.

Mass. Institute of Technology, 1918, S. B.

Ensign, United States Naval Reserve Force, 1918; Engineering Work, General Electric Co., 1918-1921; Northeastern College, 1921.

"Ye-e-e-e-e-s, that's right."

WILLIAM LINCOLN SMITH, S. B.

Professor of Electrical Engineering and Head of the Department.

Mass. Institute of Technology, 1890, S. B.

Assistant, Department of Physics, M. I. T., 1890-1891; Studied Mathematical Physics, University of Paris, 1891-1892; Instructor, Department of Electrical Engineering, M. I. T., 1893-1902; Studied Methods of Instruction in Technical Schools in England, Switzerland and Germany; Consulting Engineer, 1902-1912; Secretary, Massachusetts Association Municipal Electrical Inspectors; Member, Electrical Council of Underwriters Laboratories Inc., Chicago; Member, Society for Physical Research, London; Member, American Institute of Electrical Engineers; Northeastern Engineering since Foundation.

"Now gentlemen, you see —"

Frederick Arlington Stearns, S. B.
Instructor of Mechanical Engineering
Mass. Institute of Technology, 1917, S. B.

United States Army, Ordnance Department, 1917–1919; Instructor of Mechanical Engineering, M. I. T., 1919–1920; Northeastern College, 1920.

"Do you get that?"

SAMUEL ABBOTT SMITH STRAILAN

Assistant Professor of Chemical Engineering.

Research in Chemistry, Electrolytic Determinations, and Colloidal Chemistry Work at Massachusetts Institute of Technology, Assistant Instructor of Chemistry, M. I. T., 1913–1914; Instructor of Chemistry, Northeastern College, 1911–1919; Assistant Professor of Chemical Engineering, 1920.

"Hum-m, not bad."

Joseph William Zeller, S. B. Professor of Mechanical Engineering.

Tufts College, 1908, S. B.; Graduate Work, Electrical Engineering, 1909.

Mechanical Engineer, Sullivan Machine Co., Claremont, N. H., 1909–1911; Instructor of Mechanical Engineering, University of Florida, 1911–1913; Head of Evening Industrial Classes, Jacksonville, Florida, 1913–1916; Turbine Department, General Electric Co., 1916–1917; Head of Evening Industrial Classes, Jacksonville, Florida, 1917–1919; Instructor of Mechanical Engineering, University of Pennsylvania, 1919–1920; Northeastern College, 1921.

"Now I tell yeh."

Chester James Ginder
Assistant to the Dean.

Northeastern Engineering, 1922, Civil Engineering Course.

Northeastern Engineering, 1922, Civil Engineering Comse. Aspinwall Lincoln, 1917–1920; Stone & Webster, 1920.

"Wait a minute."

John James Sinnett Instructor of Physical Training. Springfield College, 1918.

Instructor, Lynn Y. M. C. A., 1913–1915; Director, Boston Y. M. C. A. Gymnasium since 1918.

"Everybody smile."

Charles Tischoff
Instructor in Swimming and Physical Training.
Mt. Hermon, 1910-1911-1912.

Y. M. C. A., Roanoke, Va., 1916–1918; Blue Ridge, Summer School, 1917–1918; B. Y. M. C. A. since 1918.

"His actions speak louder than my pen."— Churchill.

"E C" has made himself famous as an artist in more ways than one during his career at Northeastern. The boy who filled last year's Cauldron, as well as a good pact of this book, with cuts and cartoons is the same one who represents a streak on the track. He determined his life's career when very young, and so came to the Engineering school to fulfill his ideals and has started well on the road to success. It is true that he hitched his aims to the stars, and not moving picture stars either, so when you hear of him ending on the home stretch on the road of success just a little ahead of everyone else, as he has done many a time on the track, just remember the prediction that you read in the Cauldron

Captain class basketball (3); Arts and grinds editor of Cauldron (3); Junior Prom Committee (3); Class track team (3) (4); Varsity track team (3) (4); Student Activities Committee (3); Student Council (3) (4); Designer of shingle (3); President of class Div. B (3); Arts and athletic editor Cauldron (4); Vice-president A. A. (4); President Civil Engineering society, Div. B (4); Member Northeastern Section, Boston Society of Civil Engineers; Class Vice-president (4).

"Ye come late; yet ye come."—Schiller

"Jack," as the world has come to know him, hails from the Cape. He doesn't do much hailing now. In fact, it is often necessary for us to do the hailing, especially on cold winter mornings when one has the sensation of having been passed by something. J. J. "breezing" into school five minutes late, his regular time. Seriously speaking, "Jack" is there with the goods. He is capable of cramming more into his head the night before an exam than the rest of us can during the entire term. He may look slow at the start, but Oh! Boy—the finish is always a whirlwind and J. J. is in the center.

PERCY WARREN BAILEY

Kingston, Mass. July 5, 1901 Wapping Road, Kingston, Mass.

ELECTRICAL

Kingston High School

"The magic of a face."—T. Carew

Bailey is a product of one of our few old New England towns where the atmosphere is permeated with Pilgrim ancestral pride and distinction. Perey, however, is not slow — far be it from such, for he is our original jazz hound. The soothing saxophone seems to possess that supernatural power to produce syncopating flexures of his physical being at will. Three years commuting on the N.Y., N. H., & H. has failed to leave any mark although we know it was not the fault of the railroad. It did its darndest. Bailey's engineering practice with the Edison Light and the American Steam Gauge has been supplemented during the vacation periods with the complete mastery of the exclusive arc of soda-shaking. When so employed he was naturally exposed to the process of salesmanship and business building and as a result we expect him to strike out in a commercial enterprise. We Let on Percy.

"It takes a wise man to discover a wise man."— Xenophanes

It is said that sailors have a girl in every port, but not this hoy. No, Sir! This old salt has a half dozen in every port. Didn't you know he was a sailor? Say, just look back a couple of years and see if you can't recall old John D. Ballou walking around town with a "Gob's" uniform on. He must have been a sailor, he wore his hat at an angle of 67° 43′ 16″, which is regulation, and everything. Nevertheless, he is a darn good engineer, even if he did spend his early life chasing the mermaids. We think he will go in for concrete construction, because that boy sure can handle the old wheelbarrow. He demonstrated that fact up to Wentworth.

Chelsea High School

"I am a man; I deem nothing human alien to me." — Terence

Did you ever try to argue with this bird? Did you ever succeed in bringing him around to your way of thinking without first proving beyond a doubt that you were right? If you did, all we have to say is that Tom was sick that day. He is a quiet boy, but "still water runs deep," and it is mighty deep in this case. Whenever he does voice his opinion on any subject, his words always show real thought behind them, and they carry weight with his classmates. We know there is a place for him behind some mahogany desk.

MECHANICAL

New Britain High School

"And no man knows distinctly anything,
And no man ever will."— Diogenes

"Ray" is the inventor of the method for getting blood from a turnip. Anyway, he extracted all the class dues from a class that has always been broke. Ray is always a man of precision and he can tell you exactly how much water flows from the Charles every week to the gallon — but then everyone knows that there are two pints to the gallon. He expects to go into hydro-electric work later on in life, and that may account for his frequent trips up the Charles during the summer months. A canoe does make a good means of inspecting the waterways of the country, but why is the stenographer necessary? Please note this.

Foxboro High School

"Of two evils, choose the prettier."— Carolyn Wells

"Brit" is a very hard worker, but very few know that his hard work often leads to periods of absentmindedness. The other day a member of the Senior Class was walking down the Avenue when he met "Brit." who was acting very strangely. "I don't know what's the matter with me today, Ed." said "Brit," "I've been limping for the last fifteen or twenty minutes." "Well," said Ed, "perhaps if you tried walking with both feet on the sidewalk, instead of trying to keep one in the gutter, you might get along a little better." The above does sound a little eccentric, to put it mildly, but we have no comment to make as to the reliability of the story. We know that "Brit" is a good skate and we'll back him to the last, whether he's a somnambulist or something else.

"What is man? A foolish baby;
Vainly strives, and fights and frets,
Demanding all, deserving nothing
One small grave is all he gets."—Shakespeare

If that old adage, "Handsome is as handsome does," still held true what a homely gny this gent would be. It doesn't hold though. Gaze on the manly features before you. Can you imagine this young fellow going to the dogs? We are grateful to him for his smiling face, always found in the Lobby watching the door. We have often wondered what "Charlie" is looking for while he sits there hour after hour. Surely he can't expect some fair maiden in distress to come wandering into the "Y" looking for assistance. No. Charlie, if that's the reason you hold down the old easy chair, it's of no use. We found that out long ago.

RICHARD BAXTER BROWN, JR.

Plymouth, Mass. August 30, 1901 7 Winslow St.. Plymouth, Mass.

ELECTRICAL

Plymouth High School

"For a man by nothing is so well betrayed as by his manners."— Spencer

"Brownie" is another of the Electrical clan and hails from the famous old town of Plymouth, in fact his home is within a stone's throw of where Mary Chilton first placed her dainty foot on America's soil. "Dyke," or "Sue the city," as he is known to his friends, is the humorist of the section. He is also a musician of great note (C sharp mostly) and when he is not tooting a clarinet for the famous "Terrible Trio" he is amusing himself by listening to a radiophone concert. Altho's small in stature he is far from being infinitesimal in any sense of the word. Oftentimes he makes the trip back to the old home town for the purpose of seeing the Plymouth Rock, he claims, but we are inclined to believe that another species of chicken is concerned in the case.

Senate. Assistant Art Editor of Cauldron.

RALPH EUGENE BROWN

Haverhill, Mass. March 27, 1898 79 Center Avc., Abington, Mass.

ELECTRICAL Norwell High School

"Education makes the man."— Cawthorne

"Brownie" is the only one of the gang who can not be bothered with the female species. He says that he is through with them and we believe anything he tells us. Upon investigation, however, we discovered the interesting fact that it was not always thus. R. E. looms up outside of college as a financier. He and some other gentlemen own Lœw's theater business, and many of us have at one time or another enjoyed a show through his hospitality. The freshmen know "Brownie" best as a professor of Descript, and Drawing, in fact, he gained such a reputation that he has seriously considered the purchase of a pair of rubber-tired spectacles as an asset in the continuation of his pedagogic aspirations. "Brownie" tickles the ivories for the "Terrible Trio" though such association should not be counted against him. He much prefers the organ but his appreciation of music is better shown in that he does not pretend to sing. The last mentioned characteristic proves that he is somewhat different from the remainder of the senior A. C. class, and that distinction should prove a Godsend. He likes water in any state for his tavorite sports are skating and swimming.

Class Secretary (3); Student Council (3); Assistant in Electrical Engineering (3); Assistant Art Editor of Cauldron (4); Senate; Assistant Instructor Drawing (4).

JAMES WAID CARL, H T N

Akron, Ohio 953 Mass. Ave., February 25, 1900 Cambridge, Mass.

MECHANICAL Rindge Technical School

"For my part I would rather be the first man among these fellows, than the second man in Rome."

"Jim, the Boy Aviator, or Three Months in the Air," would surely be the title of one of the chapters in this bird's life. The achievements and various phases of his life would fill a good-sized book. He is some actor, too, having starred in "Mecca, the Quality Cigarette." As you probably surmise, he has a lot of "pep" and tries to hand it out to everyone who comes in contact with him. Sometimes it works, sometimes it doesn't. He has a failing for little bobbed haired girls, though almost any of the fair sex can turn his head. He doesn't know yet whether he will be an engineer or an actor. Either profession, we think, would keep him ont of mischief.

S. A. T. C.; Field Day Committee (1); Student Activities Committee (1) (2) (3); Orchestra (2) (3) (4); Band (3) (4); Track (3); Prom. Committee (3); Student Council (3) (4); Class President (4); Editor in Chief, Cautdron.

FRED HARRY CARLSEN

Gloucester, Mass. October 20, 1898 5 Traverse St., Gloucester, Mass.

ELECTRICAL Gloucester High School

"The lion is not so fierce as they paint him."—G. Herbert

We get "Fish" from Gloucester, Mass. Nothing spectacular about that statement unless one realizes that we refer to our classmate and not to aquatic acquaintances. Fishing is an indoor sport for Carlsen and is his sole means of support. The variety of fishing is of course that associated with the wiring of finished buildings. As an electrician he is an old-timer and his main object in taking a course with us was just to show us a thing or two. As a basketball player he proved such a wonder that the opponents found it necessary to cripple him in both legs and thereby remove him from the floor. East Boston has a peculiar attraction for "Fish"; but it does not pay to speculate in such a case for should we be in error we should be subjected to severe criticism by a tongue that knoweth no fear whether the unfortunate be "stude" or professor. Carlson excelled in the practice of living on his reputation and could make four bits go further than could the original Shylock, without half trying. That fact in itself is sufficient to insure a bright future where tuition payments are no more.

CHARLES SPAULDING CHASE

Leicester, Mass. May 29, 1901 Warren St., Leicester, Mass.

ELECTRICAL

Leicester Academy

"Rich with the spoils of Nature."— Sir Thomas Brown

"Chasie," like so many of "us electricals," did his time on the L-Street coal pile and apparently is none the worse for it. However, realizing the theological nature of the dear boy, it is difficult to imagine him objecting uproariously to any treatment. Preaching comes to him as natural as talking and heaven knows he can TALK. He takes the Post cane for tongue-wagging, with no competitors. It is nothing short of marvelous the way he gets along with the gentler sex considering the above mentioned characteristic. Perhaps it is because birds of a feather flock together or possibly they are taking lessons. "Chasie" is a member of the "Terrible Trio" of musically inclined senior electricals and should his engineering career fail he can always resort to street fiddling or song shouting to such an extent as the public will allow.

"My appetite comes to me while eating."— Montague

We don't see as much of old "Knock-Out" as we used to. The electricals stick around the Lab. pretty close now and ever since they have had their library it is hard to drag them out. Neverthcless, we see his smiling countenance enough to realize that he's still with us. Since his friends call him "Chubby" and since his appearance warrants that name, we are inclined to believe that his idle hours are spent right next to the old lunch box. Of course, we haven't any proof of this, but 'tis said that the average man cannot grow stout or live on love alone and we doubt if "Chub" is any exception. However, this form of his exactly fits the place that we have laid aside for him — right next to the stove in the General Store at West River Center 'way down in Maine. He is a good story teller, and besides, all are not electricians who study elecution.

DESMOND MICHAEL COLLINS

"His bark is worse than his bite."— G. Herbert

"Des" can argue, talk, discuss, lecture, or make a speech about any subject in such a way that you would believe that his middle name was "Encyclopedia." It doesn't make any difference whether he ever heard of the subject or not — give him a start and you have an hour's speech in store. Possibly this is the reason that he can get along without books. The secret of this accomplishment is that he has spent a good part of his engineering practice with the Sturtevant Blower people and we suspect that he specialized on hot air. Nevertheless he is right there with the goods and has certainly found one easy way to lay away the gold shekels.

"Too many cooks about the pot Will make the broth too cold or hot."—

C. H. Curran

Here is another cue artist. We sure have got our share of them in '22. "H. S." has never been known to miss a shot, for the simple reason that he always brings a slide rule and a transit to the pool room and mathematically figures out the angles and then lays them out with the instrument. Harold is seriously thinking of writing a textbook on "Shooting Pool Scientifically," and consequently is making extended experiments and researches. He finds that the average man who plays pool does not talk to the balls enough for one thing. Like the galloping dominoes, pool balls are made of ivory and although you can't talk to some kinds of ivory any artist who follows either of the above sports will tell you that the average piece of ivory of this type is really intelligent.

"It is in vain to look for a defense against lightning."—Syrus

Here is the man the world has been looking for during the past twenty years. Not only do we know it — M. Marcus takes care of that — but it is rumored that all of the large engineering firms all over the universe have been making offers to this genius, who can get more work done in an hour without taking his hands out of his pockets, than most men can do in a week's time. He is an authority on structures as well as concrete construction, but he will stop any time for a pleasant word with anybody who will talk. His favorite theme is "Wine, Women and Song." their past, present and future.

"A man is but what he knoweth"— Bacon.

Generally when one sees the letters, "A.D.", he thinks of a date. Probably that is why "AI" always has a date, he sees his initials so much that he has come to the conclusion that life is just one date after another. Probably that will also account for the variety of mustaches he is in the habit of appearing with. The explanation should go something like this; he has so many dates that he couldn't possibly get a different girl for each one, and, wishing to minimize the monotony, at least for the girls; he rears a new mustache every other day, so that the girls, by taxing their imaginations a little, will think they are out with a different fellow. Some bean, "AI".

"Who's that syncopating the old piano?" Don't you realize there is only one such in the town, —and he's in Newburyport a good share of the time. Yes, it's "Mose," All-Weight. Do you remember the way he used to rattle the teeth out of that old machine over in the barracks? He is still at it as you can see, and I don't have to tell you he can make the old "can" talk. He says he is going to be an electrical engineer, but we are under the impression that he will be engineering some orchestra by the time the rest of us are working for a living.

S. A. T. C.; Band (3); Secretary Engineering Society (4).

Class History

Many years from now, when historians shall begin to write detailed accounts of the past few eventful years, they will speak of the year 1918 as the most eventful year in the history of humanity. During this year, the most crucial events in history took place. Almost all the peoples of the world were at war, the decisive battles of the World War were fought, the armistice was signed, bringing happiness, sorrow, and peace to the world once more, and—the class of nineteen hundred and twenty-two entered the portals of NORTHEASTERN. The year of 1918 being an eventful year, it would seem that the class entering NORTHEASTERN that year was to become a distinguished class; which is exactly what took place. If there be any doubters, who, by reason of an inferior intellect, cannot agree to the above statement, they have but to peruse our eventful history to become convinced that this is no idle statement made by a class of idle boasters.

Let us hark back four long years to that fateful September, 1918, which started us upon our college career. Our country was at war, so our first thought was to offer our help where it would do the most good. Our army and navy needed officers, and men with a higher education were needed for these positions. After due thought and deliberation, we came to the conclusion that our country could use us to better advantage if we trained for these positions, and that we could achieve our personal ambitions, which were of secondary consideration, at the same time. Consequently, the most of us enlisted in the Students' Army Training Corps of NORTHEASTERN College. It was while we were in the S. A. T. C. that we made the friendships which will last us through life. Here we all lived together for two months which will always be remembered by most of us as the happiest days of our college life in spite of the "squads east" and the "K. P." During this period, our studies were sorely neglected, but the lessons in discipline and selfcontrol quite made up for the loss of our academic work. After "graduation" from the S.A.T.C. in December, the faculty decided that we had better begin to do some work if we ever were to complete the year's work, so from then until the end of the year, we made up for the vacation we had had while in the S. A. T. C.

An interclass track meet was won by the class of 1922, S. P. Coombs, S. H. Morgan, E. S. Parsons, T. G. Kelley, and C. Nyman being the chief figures in the victory.

The freshman "smoker" held in the Y. M. C. A. lunch room, was one of the snappiest shows of its kind ever staged at NORTHEASTERN. After the regular "sinkers" and cider had disappeared, the "smokes" were in order. Professor Pugsley and Dean Ell each delivered a short address which was greatly enjoyed by those present.

The freshman dance, held at the Chateau, was another never-to-be-forgotten time, at which everyone enjoyed themselves, thanks to the efforts of the committee in charge which was headed by S. Percival Coombs. After the annual field day, which was held on May 27, the freshmen ceased to be freshmen and must be considered as sophomores from now on.

The first great event of our sophomore year was the "class rush" which was an original method of initiating well-meaning new-comers to our institution. The class rush has since become a permanent institution at NORTHEASTERN, although the events have been somewhat modified since then. It consisted then of a bag rush, greased pole event, and tug-of-war across Muddy River. The bag rush was won by the class of 1922, and the greased pole event was also won by us, but the freshmen, with the aid of the elements and more luck than they were worth, managed to take the tug-of-war, which gave them the winning points for Division B. However, the class of 1922 won in Division A by such a large margin that the points lost by the Division B team were insignificant, so the class of 1922 really won the meet.

The Sophomore Dance, which occurred in December, was held in the Chateau, and the committee was in charge of S. H. Morgan who was ably seconded by B. B. Robbins, M. J. Gordon, H. R. Allen, R. J. Bradbury, and L. S. Faunce.

During this year, the class of 1922 was well represented in athletics by S. P. Coombs, B. B. Robbins, S. H. Morgan, E. S. Parsons, T. G. Kelley, C. I. Williams, and N. T. Goulet.

The class of 1922 was also well represented in the school orchestra, band, and glee clubs, as well as on the "Co-op" staff.

J. W. Carl, N. T. Goulet, W. Sperl, and R. S. Downey were our representatives in the orchestra and band, while J. E. Gould and E. F. Maloney were assistant editors on the "Co-op" with C. S. Toole as business manager of said publication.

In the fall of 1920, we returned to school and proceeded to elect officers for the year 1921. In Division A, the election results were: S. H. Morgan, President; C. S. Toole, Vice-president; E. F. Maloney, Secretary; R. Bradbury, Treasurer; Professor J. B. Pugsley, Faculty Advisor; S. H. Morgan, cheer leader; J. W. Carl, Student Activities Committee; and E. F. Maloney, chairman of the Entertainment Committee. Division B results were: E. C. Allen, President; N. T. Goulet, Vice-president; R. E. Brown, Secretary; W. Sperl, Treasurer; Professor A. J. Ferretti, Faculty Advisor; B. B. Robbins, Student Activities Committee; D. L. Hulsman, cheer leader; and E. L. Dearborn, chairman entertainment committee.

The first event of the school year was the informal "smoker" held in the Gainsborough Building, and it sure was "some smoker." Doughnuts, cider, "smokes" and music were the main events of the night, Downey and "Mose" Wright furnishing the music. Everyone present certainly enjoyed a large evening.

The informal dance of the junior class was held in December, just previous to the two Christmas holidays, at Grantanbry Hall, North Cambridge. As the "Teeh" very humorously stated, "The absent ones missed absolutely the best dance since the days when 'Jack Busby' sang 'Auf Wiedersehen' to 'Elsie' when the Chateau lights grew dim." The dance was another of the many great successes which must be credited to the class of 1922.

On November 12, 1920, the junior class held a combination smoker and banquet at Healy's Hotel. The committee in charge consisted of E. L. Dearborn, H. W. Hale, and R. B. Bradstreet. Music was furnished by the school orchestra, and instrumental solos were rendered by various of the class musicians.

The Junior class was well represented this year in all athletics. The class had three men on the varsity basketball team; B. B. Robbins, F. H. Carlson, and F. L. Flood. On the track team we were represented by J. W. Carl, S. P. Coombs, T. G. Kelley, S. H. Morgan, C. L. Nyman, E. C. Allen, and C. I. Williams. We were represented on the baseball team by I. I. Rosenblatt, T. G. Kelley, S. H. Morgan, F. L. Flood, and B. G. Turner. All of our athletes have proved that they are of good calibre and are capable of giving keen competition to the best of other colleges.

The class of 1922, besides being an athletic class, has also much musical talent. In the college orchestra, we were represented by six members. We were also represented on the college band and dance orchestra.

The greatest social function the school has ever known was held by the class of 1922. The Junior Prom was given on April 15, 1921, at the Hotel Buckminster. The elements were against the class as old Jupe Pluvius again showered us with his blessings, but to no avail. The "hard-boiled" shirts, "angel" collars, and dancing pumps were well encased in rubber so that their beauty was in no whit impaired. The dance program was a leather folder for the men, while the girls received a leather vanity case, which is still used by many of them. After many hours of practising, most of us had learned how to obtain our handkerchiefs gracefully, and could therefore enjoy a very pleasurable evening of dancing. The hall had been beautifully decorated in the class colors, and the music which was furnished by "Art Tornquist's Jazz Hounds" was unsurpassed. The committee consisted of E. C. Allen, J. W. Carl, S. P. Coombs, E. L. Dearborn, L. S. Faunce, N. T. Goulet, D. L. Hulsman, F. E. Junior, S. H. Morgan, and B. B. Robbins.

The greatest and most enjoyable event in the entire school year is the Annual Field Day held at Riverside-on-the-Charles, and the one held last year on June 4 greatly surpassed all the previous attempts. This was the eleventh annual Field Day and was, as Professor Spear had promised, a beautiful day for such an important event. Baseball, track, athletics, canoe races, tub races, tilting contests, swimming races, and diving exhibitions were run off in rapid-fire order, and a thoroughly enjoyable time was enjoyed by all. The committee consisted of E. S.

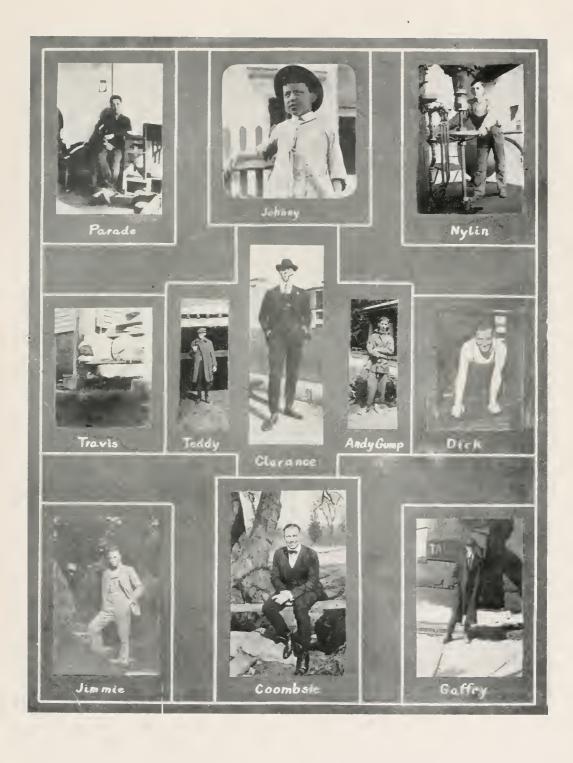

Parsons, S. P. Coombs, N. T. Goulet, D. L. Hulsman, L. S. Faunce, E. C. Allen, W. Sperl, J. W. Carl, S. H. Morgan, F. L. Flood, J. E. Gould, E. F. Maloney, F. E. Junior. This was the final event of the school year, and a very worthy finale it was. Graduation took place on June 18, and the class of 1921 became alumni of NORTH-EASTERN. The class of 1922 became seniors.

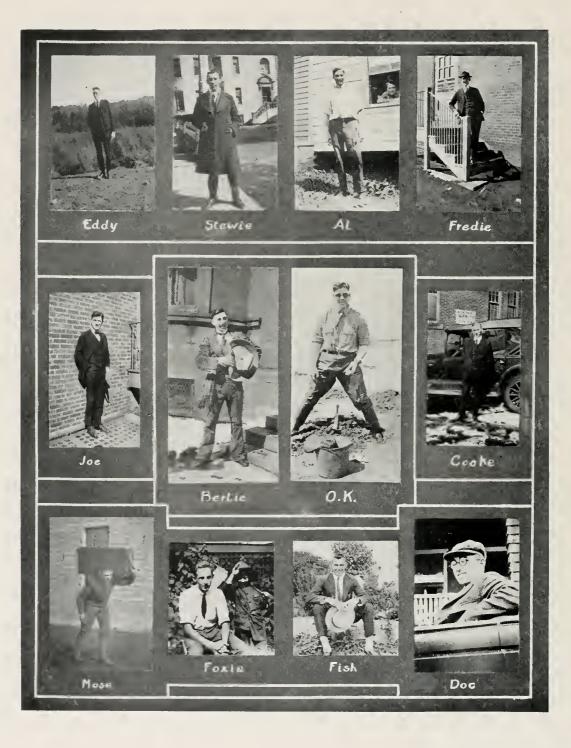

Upon the opening of the fall term, the first thing of importance was the election of officers for the senior year. J. W. Carl was elected president, and E. C. Allen was elected vice-president. The other officers for Division B were C. R. Pearson, secretary, and W. Sperl, treasurer. For Division A, the officers were S. H. Morgan, vice-president, F. L. Flood, secretary; and R. J. Bradbury, treasurer. The senior class decided to hold all of our social activities during "senior week" which comes in June, and settled down to work for the final year in school.

This is the conclusion of the history of the class of 1922. After reviewing all the good times we have had together during our four years of college life, we come to the conclusion that these four years have indeed been the happiest which we have ever spent, or probably will spend. It is impossible to conceive of any college, large or small, that can boast of a more enjoyable student life than can NORTH-EASTERN. We feel sure that future classes will profit by the example of good-fellowship set by the class of 1922.

"COOMBSIE" President, Division "A"

"BERTIE" President, Division "B"

The College Pear

Life ships silently along in its course and while the earth has pushed its way slowly and steadily about the sun another chapter has been completed in the History of NORTHEASTERN. Our Alma Mater's fame has continued to grow, for she has created a spirit that is superior to any one man, or group of men, and, with this spirit, her sons are going out into the engineering world. The old traditions have survived the enormous growth of the school while others have been added. The College today is the same as the "Co-op" school of yesterday. The scene and setting are the same, the same act is produced, but by different actors.

The aim of the college is to teach men how to get the most from life and how to give to humanity in return the maximum of service. In order to accomplish this, a great deal more than college work is necessary. The social side of college life is of perhaps as much value as the studies to a man. This broader conception is given by Henry W. Longfellow: "Where should the student live? In solitude or in society? In the green stillness of the country, where he can hear the heart of Nature beat, or in the dark grey town where he can hear and feel the throbbing heart of man? I will make answer for him and say in the dark grey town."

Within the walls of young NORTHEASTERN and in the halls about the city which have held gatherings of our men there has always been the spirit of satisfaction, and while we cannot here relate the details of every happening, we wish to recall the memories of some of the prominent affairs of the past year.

Before entering upon this pleasant task it might be well to point out the purely democratic spirit which has always existed among our students. No one has ever been barred from any College affair because of his financial condition.

The Dear Begins

The year of 1921 was hardly under way when a change in the name of the school was announced. Previously the title had been "Co-operative School of Engineering," but the word "Co-operative" had become so common as well as indefinite that it was dropped from the official title for the school. Even now many of the older alumni refer to the good old "Co-op School."

Not long after this another change in name was announced,—Professor Spear announced his engagement—and while it is not our purpose to bring up personal affairs here, still this was important, because several others of the faculty took to the idea, and before the term had ended Mr. Porter, Mr. Stearns, and Professor Melvin had followed in Professor Spear's footsteps.

After the Sophomore Dance, so well described in the 1921 Cauldron, the freshmen held their first dance at the Beech Street Bungalow and successfully competed against fate in the form of a raging storm. This class closely followed the dance with one of NORTHEASTERN'S famous Smokers, with stories, eorn cobs, eider and doughnuts in the right proportion. The sophomores, it seems, took an interest in this affair, for they were still skeptical of their new friends and consequently they had an extra force of men on duty to rescue any unwilling guest.

The first big event of the year run by the whole school was the Midwinter Social. Into this one evening was crowded a small track meet, including an exciting interdivision relay race, a basketball game in which our five surprised everyone by winning for the first time, and swimming events. B. A. Root became selfish and came away with three gold medals. The scene of action was shifted and everyone sauntered to Bates Hall, where Dean Ell gave a short talk and awarded the medals for the various athletic events. The floor was cleared and the school orchestra immediately set everyone to dancing. Refreshments were served and it was only a short while when some pessimist reminded the happy throng that Saturday was turning into Sunday.

A new full-time section of Freshmen entered the school early in February. They were well greeted at the Freshman Danee held February 10 on the Steamer "Jack O'Lantern." The basketball team had made trips down Maine and up through Vermont and the track team had already made a name for itself, so altogether the Social Calendar was well filled during the winter months.

The faculty, not to be outdone by any athletic team, took up bowling, and after much diligent practice became almost as good as the office force. Early in March the students were pleased to learn of the advancement of Mr. Strahan, Mr.

Ferretti, and Mr. Melvin to assistant professorships. These met with the hearty approval of the student body.

By this time both the band and the orchestra were well limbered up and were greeted enthusiastically every time they made their appearance at the weekly mass meetings. The special lecturers at the meetings gave a course that none of the students missed and everyone benefited from them. Among the speakers were Dr. Charles W. Eliot of Harvard, President George B. Cutten of Areadia University, Dr. Payson Smith, State Commissioner of Education of Massachusetts, Dr. C. A. McCree of the Near East Relief Association, Professor G. F. Swain of Harvard, Mr. Olin W. Hill of Babson Statistical Organization, and Attorney Asa S. Allen. All of these men are leaders, and the students found their advice well worth having.

On the 13th of March, Professor P. C. Nash, the director of Engineering Practice, was granted a leave of absence in order that he might take up new duties at Antioch College. Professor Nash was well liked by everyone and it was with deep regret that he was allowed to leave. Professor W. E. Nightingale was welcomed into the school and has been well able to handle the Department of Engineering Practice. Professor Alvord at the same time became head of the Civil Engineering Department.

On the 11th of March the Class of '22 held a Smoker in the Gainsborough Building, and besides a good time, important plans were developed for other functions. The class already held a reputation for putting affairs across with great success. Plans certainly materialized, for on March 19 a dancing party was held in the Gainsborough Building for the Juniors. This was called a Get-Together, the final object being the Junior Prom, which was not far distant.

The fraternities proved very much alive and many banquets and dances livened many otherwise dull evenings. A chapter of Sigma Omega Psi was formed early in March.

On March 25 the College Glee Club made its debut at the weekly mass meeting, and they were greeted most enthusiastically.

Early in April, with the opening of the baseball season and the advent of spring, new life seemed to be aroused both outdoors and inside. The Freshmen were requested to shake the dust off their little red and green caps and again don them.

About this time the marks and activities of all the upperclassmen were earefully weighed and sixteen men were chosen to be the charter members of an Honorary Society, which is now called the Senate. A little later on, when Division A returned, eight more names were announced. The Senate is one of the strongest societies in the school and it is a great honor to be chosen a member.

W. C. Riehards was unanimously chosen as Orator of the Senior Class, after a series of trials. Professor Benedict came into the limelight when he announced the birth of a daughter.

The climax in the history of the Junior Class came on the night of the 15th of April, when the class held the annual Promenade at the Hotel Buckminster. It was a formal dance in name only, and after the surprise dance orders were distributed, the good time actually began. About a hundred couples—the girls in their dainty costumes and the boys in full dress—made an exceedingly beautiful picture in the gold and white ball room. In spite of the weather, couples came from all parts of the country. We quote from the "Tech" to show the predominating democracy of the occasion:

"Twas the 16th of April in '21 When the orchestra quit and called off the fun Packards and 'Cadies' lined up to the river, But ahead of them all stood the old family flivver."

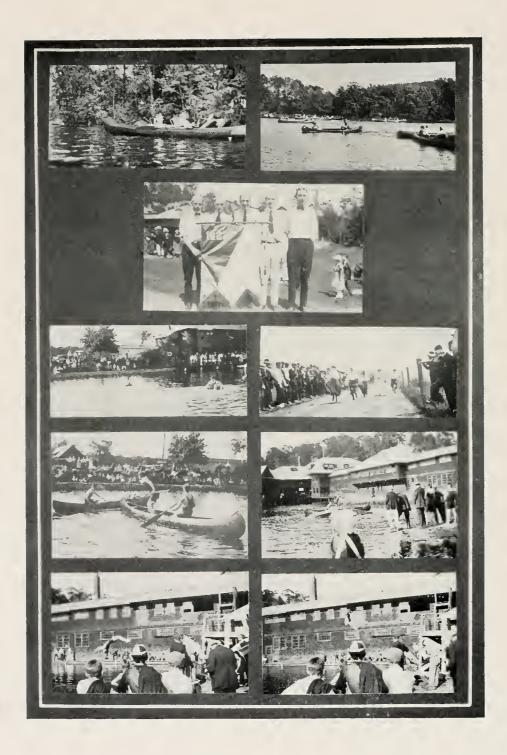

On April 21 the NORTHEASTERN "Tech" staff held their annual elections and at the same time a banquet. The "Tech" is the official school organ and it is in a class with the best of college weeklies. Edward Maloney was announced as editor-in-chief, and this announcement was unanimously approved of by the rest of the staff, as well as by the student body in general.

The second Red Letter Date for the college as a whole was the Spring Carnival, held on May 4, when Bates Hall was crowded to its capacity, fully 600 attending the best entertainment ever given in Bates Hall. Here the musical clubs, including the orchestra and the band, were at their best. The fraternities gave sketches and comedies that received great applause. A brass quartet, a saxophone sextet, two quartets of songsters, and several solos were among the musical features.

On the 13th of May, in fact, Friday the 13th, the Sophomore Class had an informal dance. As is the custom with this class, a huge surprise in the form of a widely advertised "live baby" was given away. Dean Ell and Professor Spear combined and adopted the little hog which later on provided a fine feed for the class.

We must not forget the valuable information that the "underground pifflering department" of the "Tech" gave out in regard to a huge scandal involving several of the professors and a fishing party down in Maine. It certainly looked bad for a while, until the guilty were proved innocent.

To eap the climax of a prosperous and enterprising year came the huge Eleventh Annual Field Day, which was held on June 4 at Riverside. Professor Spear had ordered a perfect day and the students, faculty, alumni and friends were all there. The water events included canoe races, a tub race, and a tilting tournament. A faculty 440-yard dash caused a lot of excitement as did the wheelbarrow race. A very pretty exercise was the presenting of the Senior Class banner to the Freshman Class by the Seniors. The presentation of the "N's," as well as class numerals, was another feature. A baseball game with Springfield College ended with the score against us. As night drew nigh, box lunches were given out and canoes began to

glide in and out of the banks of the Charles. A band concert preceded the twilight dance. A late train earried the happy throng back from a perfect day.

The members of Class of 1921 were fast covering their last lap as students and it was a great day in the history of the College when on June 15, seventy-six degrees were given out at the annual Commencement. Thirty-six Seniors took home the sheepskin and forty of the alumni. This was the first time degrees were issued!

The Seniors finished in high and Senior Week began on Saturday, June 11, with thirty-five of the graduating class at the Quiney Hotel. The banquet did not lack in spirit and pep, and plenty of vamps enticed the men. On Sunday evening, the scene was the Old South Church, where Reverend Frank Sheldon delivered the Baccalaureate Sermon. On Monday, many of the class with lady friends enjoyed a boat ride to Plymouth and inspected the city thoroughly.

Tuesday evening found the same party, with additions, at the Oak Square Bungalow, where the college orchestra capably filled the novel dance order, the dances being dedicated to members. Thus the Class of '21 went forth with plenty of memories stored away for future use.

Summer School

Summer School, which is the official vacation of the College, but not of the students, lasting only three weeks for each division, was mainly filled with official announcements for the coming year. Dean Ell announced additions to the faculty: Joseph W. Zeller, Assistant Professor of Mechanical Engineering, who also proved an efficient track coach: James W. Ingalls, instructor in Chemical Engineering; Maurice E. Goodridge, Assistant Director of Engineering Practice.

Elaborate plans were made to have all athletic directors members of the faculty. NORTHEASTERN is unusually fortunate in this respect.

A little later on drastic alterations were undergone and the whole school, under the direction of Dean Ell, was divided into three distinct divisions. Professor Spear heads the Student Activities Department, which regulates all student functions; Professor Pugsley directs the School Administration; Professor Nightingale is Director of Engineering Practice, and has charge of everything concerning this phase of the work. Arthur E. Smithies, who had become well known and liked, tendered his resignation as Assistant to the Dean to take up the teaching profession, and not long after Leon F. Girard, assistant in the Physics Laboratory, resigned. Mr. Girard was a member of the pioneer Class of 1913 and at present he is in the optical business. Another valuable announcement was made when it became known that Madison P. Jeffery had been secured to coach baseball, basketball, and football.

During this time the first edition of the Freshman Bible was being published and now nearly every member of the school has one in his pocket.

During the Summer Term the Senior Class had their annual elections and James W. Carl was chosen as President.

Altogether it was as bad as a ten years' term, but the weather man was to blame for most of it.

However, there is one argument in favor of Summer School. The circus, which comes but once a year, comes at this time and makes its appearance so that everyone and especially those in the large drawing room of the main building have an excellent view. This keeps many men from sleeping.

The Present Pear

The opening weeks in September 1921 were as well filled with activities as any three ring circus and in more ways than one the school year started off with a Rush.

The largest freshman class in the history of the school had to be welcomed and cared for in accordance with the usual NORTHEASTERN custom.

On the first Friday night these newcomers were given a reception under the auspices of the Senior Class, and as usual the professors were given a chance on the platform. Everyone was given a chance to smoke up, imbibe freely of the eider, and partake of the doughnuts. Dean Ell imparted some timely advice on school life. Extemporaneous entertainment was furnished when the Sophomore banner suddenly disappeared, and after a short but heated pursuit by the sophs the guilty ones were brought back in view of all. But this was only one small event in the evening's entertainment, a fitting one with which to begin the year.

On the following Tuesday, the annual Freshman Rush was staged in the Fenway. A holiday was declared and everyone headed for the scene of the traditional event. The events opened with an obstacle relay race which was so full of obstacles that even the movie men had a hard time getting pictures. Then the boxing bouts, pole rush, and tug of war across Muddy River all proved intensely exciting and when the total points were finally added up the Freshmen were victorious. So in clouds of dust, grime and sweat the bloody warriors triumphantly formed a snake dance back to Bates Hall, where a grand peace conference was held.

However, the determined Sophomores would not admit the Freshies' superiority, and right away challenged them to a track meet. This proved to be a closely contested match until the very end, when the relay race gave the Sophs victory.

Then these freshmen which had attracted so much attention from the beginning gained recognition in the series of interclass baseball games and claimed the championship by trimming both the Sophomore and Junior teams.

Seldon P. Coombs was elected Captain of the Track Squad, which was already large and which shows promise of a successful season. One hundred three men reported at the first call with Division B yet to be heard from.

The athletic association, composed of all the students, discarded its old and

cumbersome constitution at one of the regular mass meetings and adopted a new one which met with the approval of all. This made provisions for the awarding of letters and sweaters to NORTHEASTERN men. Soon after the nominations, the A. A. officers were elected by a committee composed of men from each class. F. L. Flood was finally chosen President.

Thus it took less than a month for the various classes and organizations of the school to reorganize and get going. It has often been said that engineers do things quickly and many times on the spur of the moment, but never unwisely. NORTH-EASTERN proved no exception to this rule.

The different engineering departments had become well organized through Engineering Conference and in addition to interesting lectures given twice each week, the students took many trips to co-operating firms and other leading manufacturers.

In Division B, E. C. Allen was elected President of the Athletic Council and B. B. Robbins, President of the student body.

The first cross-country run ever held at NORTHEASTERN took place on November 10, and twelve starters fought hard for the lead over a two and onehalf mile course, but it was E. N. Sampson who took the honors.

Professor P. W. Durkee of the electrical department was forced to leave school on account of ill health to the regret of all.

On December 2, the basketball season started, and while the team won only its share of victories during the season, they did much better than the previous year. Considering this is NORTHEASTERN'S second year, a firm foundation for the future has been established. These games will be well remembered by everyone who has given the lusty "Ho-Yah" for the team.

The Junior Class had, on the other hand, been paying special attention to fattening the "baby" given away at the Chateau on May 13, and so on November 17 they decided that Roast Pig should grace the banquet table in the Gainsborough Building. This proved perhaps the best stag party ever run by the class.

On Friday, December 2, it rained and was very dark and dismal. No one forgets this, for they remember the contrast with the Freshman Dance which was held at the Chateau. The bright aspect of the two hundred present even kidded the man in the moon to show his face by the time the party broke up. Two weeks later the same class held a smoker in the Gainsborough Building and featured a minstrel show.

In the meantime the Sophomores had a smoker with a few Freshies present for entertainment.

On December 14 the Juniors formed in line for another famous smoker with plenty of smokes, stories, music and eats to liven up the evening.

And so hardly before we had realized it Christmas was here and it was as though the gods of fate had been unusually kind to us, for each division was given three whole days' vacation with absolutely nothing to do except to finish all back work.

The Sophomore Class of Division B took the lead of the opening year of '22 and on January 6 held a dance in Gainsborough Building which they discovered made a much better ball room than class room. An orchestra from the school helped in making the party very enjoyable for all who attended.

On January 20, the Freshman Class of Division A, which was soon to leave school until another year, held its second and farewell smoker in the Gainsborough Building, and like every other function of note at NORTHEASTERN it was according to the "Tech" the best one ever held by any class. But even though every function is not the best according to public opinion, is it not well that the men should think so?

For more than a month everyone had been waiting and planning for the grand Midwinter Social, which was scheduled for January 28. This event more than exceeded all expectations as every student, and almost an equal number who do not belong to the school, and who will never become engineers, will vouch for. Perhaps the most thrilling performance of the evening was the exciting basketball game in which the winning basket for NORTHEASTERN was made in the last few minutes of play. To cap the climax, Rhode Island State made another basket just one instant too late, for the final whistle had blown, leaving the score 30-29. The track meet before the game and the swimming events between the halves also helped to make this third annual social "the best ever." The events began promptly at 6.30, so that by 9.30 both Bates Hall and the large drawing room in the Gainsborough Building were both transformed into dance halls and it was hard to decide which was the better. However, it was the crowd and NORTHEASTERN spirit that made the dancing party a huge success to such an extent that it was the main topic of conversation for weeks afterward.

This Social also served as a farewell party to the Freshmen, many of whom packed their trunks the following day for a vacation until the summer term. And then another new class of Freshmen had to be ushered into college life.

We must not forget the organization which made its debut at NORTHEAST-ERN at this time—the ancient and honorable order of Shifters, which was having its run at nearly every college in the country. This epidemic claimed a great deal more men than the flu did—for every one, from the Dean to the janitor, was admitted within the secret portals.

Our Track team made a good showing at the Annual B. A. A. Games, February fourth, and followed up this good work on the seventeenth of the month when they overwhelmed the Clark team in our own gym. On Washington's Birthday, they went to Worcester and more than made the Polytechnic School there scratch for points.

The Seniors held their only winter class event on the seventeenth, when they

with their fair friends gathered at the Majestic Theatre. The rest of their events they will save until the last week of school when they all will feel free for a week's spree.

The Sophomores of Division A held a dance on the twenty-third of February, at the Heinemann House in Somerville. Those two hundred who were present still have pleasant memories of the occasion.

Then came the Big Round-Up on March fourth, at the Bostou City Club. This affair was stag and even then there were more than 800 present. These men represented the alumni, faculty, students, and employers. It was a combination Spring Carnival, Degree Jubilee, and Reunion of the sons of NORTHEASTERN. There was plenty to eat, drink, and smoke. Honorable Guy A. Ham gave a speech suitable to the occasion. The band, orchestra, and other musical clubs were presented amid uproarious applause and the final show put on by the students was unsurpassed in originality and in the professional way in which it was presented. Everyone agreed that the Round-Up was the biggest and best of its kind in the history of the College.

DUMB "BELLE" CHORUS

Following this there were plenty of class and fraternity smokers and danees to keep the men out of mischief. The basketball season ended to the satisfaction of all and the team was given a royal banquet. The team made a far better showing than any previous teams and incidentally made a good foundation for next year's team.

The Baseball team then took the attention of the students and after many weeks of hard training they began the season on April eighth. The team sizes up like one worthy of its name and no doubt many victories will be won.

The Faculty held a social all by itself on Saturday, March 18th, and while it is not the student's privilege to know just what happened the Tech stated that it was a rendezvous of joyousness, good-fellowship, and genial hilarity, so we will not attempt to further reveal the secrets of so mighty a gathering.

And now it draws time for us to "cut it short," as the expression goes, while a good many of the big events of the year are yet to take place. It is said that half of the joy is in anticipation and many have already begun to enjoy the Junior Prom which is scheduled at the Hotel Somerset and promises to be better than ever. And then Field Day another grand outing for the whole family! The Seniors are having a whole week to celebrate their grand "finis!"

However, we feel justified in saying that the past Chapter in the History of NORTHEASTERN has been crowded with the good works of her men. We feel sure that succeeding Chapters in a like measure will reflect the glory of NORTHEASTERN as long as the world shall last.

L. S. F.

FIELD DAY, 1921

The Social Calendar

January 1921

- 1 Holiday Everybody is happy.
- 2 Dr. Charles W. Eliot speaks at mass meeting.
- 8 The word "co-operative" is dropped from school name.
- 9 Office girls break records and backs bowling.
- 10 Honorary Society formed. A K Σ Social in S. A. room.
- 11 Profs Spear and Ashley harmonize with jazzy tunes? ??
- 14 NORTHEASTERN defeats Tufts on the track.
- 15 Dance follows basketball game with Middlebury.
- 18 Sophomore hop at Whittier Hall, Everett.
- 21 Curtiss Waterman lectures. Freshman Smoker.
- 22 Orchestra and Student Activities Committee have pictures taken.
- 27 A K Σ banquet at Quincy House.
- 28 H T N holds formal initiation. B I E pledge dance.
- 29 Mid-winter Social. Some night.
- 31 New freshmen enter. Division A returns.

February 1921

- 2 Alumni hold smoker in Gainsboro building.
- 5 B. A. A. games. Clark and B. U. disappointed.
- 8 Basketball team disappears in Vermont.
- 10 Freshman Dance at Jack-o'-Lantern. E. H. S. elub Social.
- 11 Dr. Payson Smith speaks. B. U. defeated in dual meet on track.
- 19 I. M. Guffus discovered in Tech. Masquerade at Y. W. C. A.
- 14 Mechanicals visit Edison Plant in South Boston.
- 16 Bates Team guests of H T N at Keith's.
- 17 Dance after basketball game with Bates.
- 21 No school all doors locked tight.
- 22 American Legion Games. Brown's relay team defeats us.
- 25 Dr. G. B. Cutten talks to students. A K Σ Dance, Arbedeen Bungalow.
- 29 No such day recorded on ealendar.

March 1921

- 1 Baseball candidates report. B Γ E holds pledge Smoker.
- 2 Mr. L. J. Burrel of Link Belt Co. at Engineering Conference.

- 4 Track team beaten by Harvard. Faculty Advancements.
- 5 HTN have annual Banquet at Westminster Hotel.
- 7 Division B comes back strong.
- 11 Dr. C. A. McCrea is special lecturer.
- 15 Prof. Benedict eaught smoking. Great seandal.
- 17 Basketball team finishes schedule.
- 18 Dr. G. F. Swain of Harvard speaks at Mass Meeting.
- 19 Junior get-together at Gainsborough, Girls there.
- 24 Spring in the air.
- 25 Glee Club appears at Mass meeting.
- 29 Prof. Joe Spear has bright idea still a secret.

April 1921

- 1 Mr. Olin Hill lectures. B Γ E Dance at Hampton Courts.
- 2 Baseball season opens with Harvard.
- 6 $\Sigma \Omega \Psi$ Smoker in Student Activity Room.
- 8 Division B men announced for Honorary Society.
- 10 Freshmen all excited. Fire Engine goes by the school.
- 11 Division A returns to school.
- 13 Prof. Philip C. Nash leaves school.
- 14 W. C. Richards chosen as Senior Orator.
- 15 Junior Prom. Division A Honor men named. Freshmen caps appear.
- 18 Nothing doing. No school.
- 19 Patriots' Day. Saloons closed. H T N visits Harvard.
- 21 Tech Staff have banquet and next year's staff is named.
- 25 Baseball team plays at Braves' Field! "Home of Big Things."
- 27 Charlie Williams goes home early. Had eaten all his lunch.

May 1921

- 4 Grand Spring Carnival in Bates Hall.
- 5 $\Sigma \Omega \Psi$ Banquet.
- 6 Attorney Asa S. Allen lectures at Mass Meeting.
- 7 Several Profs. go on stag party in Maine. Almost a scandal.
- 13 Friday. Sophomore Dance at Chateau. Live baby given away.
- 14 Intercollegiate Track Meet at Springfield.
- 16 Division B return for fourth period.
- 17 Honorary society meets. B. U. Track meet cancelled.
- 19 Σ Ω Ψ Interchapter dance and banquet at Hampton Courts.
- 23 Jack Alves gets to class on time. His watch fast.
- 24 Out-door track meet with Tufts.

- 28 No school. Mr. F. A. Stearns gets married.
- 30 Declaration Day. B Γ E takes trip down harbor.
- 31 No school. Parad comes just the same.

June 1921

- 1 A K Σ Dance at Larchwood Bungalow.
- 3 Alumni get-together in Gainsborough building.
- 4 Annual Field Day at Riverside.
- 9 E. H. S. Get-together.
- 10 Dr. A. E. Winship talks to students.
- 11 Senior Week begins with a banquet.
- 12 Baccalaureate Sermon.
- 13 Senior Picnic at Provincetown.
- 14 Seniors hold formal ball. Cauldron staff elected.
- 15 Commencement and Reception of Senior Class.
- 16 Entrance Exams. B Γ E Dance at Winthrop Yacht Club.
- 17 Bunker Hill Day. No business.
- 18 No school. Mr. R. G. Porter is married.
- 20 Summer school begins. Weather is muggy.
- 22 Reconstruction period, new officers installed.
- 25 Report cards come out. Hospitals overcrowded.
- 28 Dick Frye almost falls in love.

September 1921

- 5 Labor Day. Not for the Summer school.
- 8 Entrance exams. Everyone welcome.
- 12 School opens. First mass meeting.
- 16 Prexy Speare talks. Freshman reception.
- 17 Many favorable comments on Tech Vol. II.
- 20 Annual Freshmen Rush. So do Sophs.
- 27 Sophomores win exciting track meet 25-24.
- 28 Stewie Morgan thinks it's time to begin studying.
- 30 New A. A. constitution digested.

October 1921

- 4 First call for basketball sounded.
- 5 Alumni meeting at United States Hotel.
- 7 Dr. Henry Crane speaks. H T N Smoker.

- 10 Mechanieals visit Dennison's Plant.
- 11 Mr. E. Clark Worman lectures.
- 12 Columbus Day. Factory is closed.
- 17 Division B starts school.
- 21 Services of school offered in RR. strike.
- 22 Prof. Zeller is five minutes late to classes.
- 26 Inter-fraternity Council Meeting.
- 25 Basketball squad cut.
- 28 President Murlin of B. U. talks.

November 1921

- 4 Colonel Gow speaks to Civils.
- 5 A K Σ Dance at Larchwood Bungalow.
- 9 B I E Smoker at their house.
- 10 Cross Country rnn.
- 11 Three days vacation begins.
- 14 HTN Social at 416.
- 18 Exams, in progress.
- 17 Great Disappearance of Roast Pig. 1923.
- 24 Prof. Durkee given leave of absence.
- 23 Vacation begins.
- 24 Thanksgiving Day. Everybody eats.
- 29 A K Σ jubilee.

December 1921

- 1 N E Z Banquet at Hotel Buckminster.
- 2 Dr. D. Wileox talks. Freshmen Dance at Chateau.
- 6 Civils visit Structural Steel Co.
- 9 B Γ E Dance at 50.
- 8 $\Sigma \Omega \Psi$ Smoker.
- 10 Y. M. C. A. Indoor Track Meet.
- 13 H T N Pledge Dance, Grantanbry Hall.
- 14 Mr. R. H. Newcomb lectures. Freshman Smoker.
- 15 Mr. Brewer Eddy at mass meeting.
- 16 Junior Class holds Smoker.
- 20 Dean Nash of Antioch talks. B Γ E Dance at 50.
- 22 Vacation on account of Christmas.
- 26 $\Sigma \Omega \Psi$ Annual convention in New York.
- 28 Division B comes to school.
- 29 Paver says his business is picking up.

January 1922

- 1 New Year's Day, according to custom.
- 2 Another holiday. No one kicks.
- 6 Bishop Hughes speaks. Sophs dance in Gainsborough.
- 7 Parad figures out the age of his employer.
- 11 N E Z Dance. Beachmont Bungalow.
- 13 Basketball team goes North.
- 18 Harvard Liberal Club meeting, Fanueil Hall.
- 19 Entrance Exams, for prospective freshmen.
- 20 Mr. R. B. Wilson lectures. Freshmen Smoker. 304G.
- 21 Λ K Σ Dance, Jacquemout Bungalow.
- 28 Mid-winter Social. Everyone there.
- 30 BΓE Formal pledge Dance. Riverbank Court Hotel.

February 1922

- 1 H T N Social at 416.
- 4 B. A. A. Games. Not a fraternity.
- 6 System of tardy slips installed.
- 9 S. A. Office shifts to Gainsborough.
- 10 Brother Joe Chapple talks. Intercollegiate Dance.
- 11 X E Z Dance at Beachmont Bungalow.
- 17 Senior Theatre Party. Clark Track Meet. Λ K Σ Smoker
- 18 Mr. Risley, Secretary of labor, lectures.
- 20 B Γ E Smoker.
- 22 Track Meet at Worcester. $\Sigma \Omega \Psi$ Dansant.
- 23 Sophomore Dance. Heinemann House.
- 25 Alice refuses to be kidded.

March 1922

- 1 Tuition Due. It always is.
- 4 Round-Up at Boston City Club.
- 6 Second semester starts.
- 9 Danee after basketball game. '23-'24 Meet.
- 11 A K Σ Dance.
- 10 Benny gets acquainted with Dawe.
- 15 $\Sigma \Omega \Psi$ Dance.
- 16 H T N Social and Smoker at house.
- 17 Mr. Harold A. Thurlow at Mass meeting.
- 18 Auto Show ends. Big Faculty Social.

- 13 Loew's State Theatre Opens.
- 24 B Γ E Dance at 50.
- 28 Interclass Track Meet.
- 30 Senate announce new men.

April 1922

- 1 Annual Banquet of H T N Carlton Hotel.
- 5 E. H. S. Club Stag Social.
- 6 Three days vacation begins.
- 8 Baseball season opens.
- 17 Vacation for Division A.
- 18 Home beautiful Exposition at Mechanics building
- 28 Junior Show.
- 29 Open Date. Game pending.

May 1922

- 5 Cauldron Day.
- 12 Junior Week begins. Theatre party.
- 13 Junior Smoker.
- 14 Go to church.
- 15 Junior Promenade, Somerset Hotel.
- 29 Holiday.
- 30 Memorial Day.

June 1922

- I Thesis due. Most of them don't.
- 10 12th Annual Field Day.
- 13 Week of Final Exams.
- 16 Senior Week begins. Banquet.
- 17 Bunker Hill Day.
- 18 Baccalaureate, Old South Church.
- 19 Senior All Day Outing. Summer term starts.
- 20 Senior All Night Dance.
- 21 Commencement, Opera House.
- 22 The end of the 22nd Chapter.

College Songs

Our Alma Mater

Oh, Alma Mater, here we throng, And sing your praises strong; Your sons they gather far and near, And seek your blessings dear; Fair memories we cherish now, And will forever more, Come let us raise our voices strong, N-O-R-T-H-E-A-S-T-E-R-N we adore.

Laud Northeastern

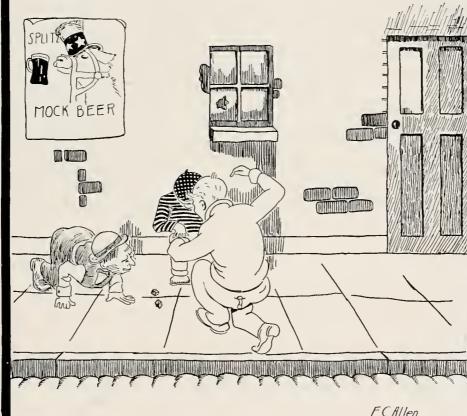

So let us laud! laud! Northeastern,
Sing her praises to the air,
She's a college of worth and all over the earth
Comes her victory cry of
(Yelled)
"Slip not, cyclop, do it with a Co-op,"
Our Alma Mater, we will always remember, so let us
Laud! Laud! Northeastern;
May her honors never cease!

Co-Op

Of all the schools I know, here's to Northeastern, Red, White and Black shall always wave in the sky; Her sons are men of truth, each one is loyal, They're from the Co-Op School, that's why.

1921 Baseball Season

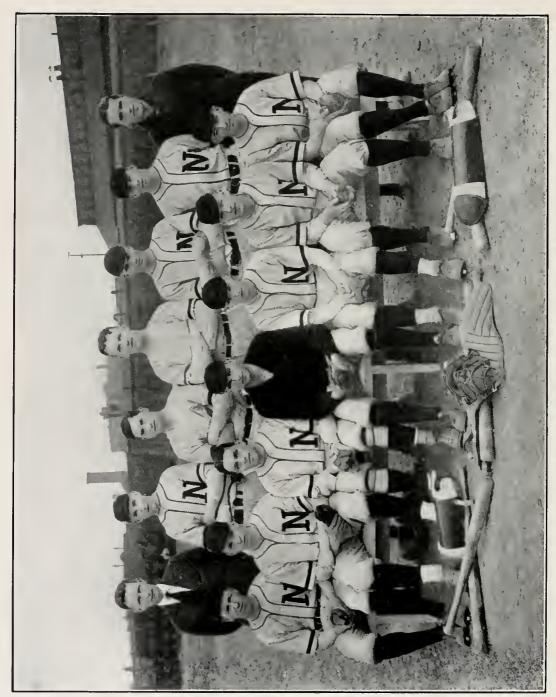

In the spring of 1920 baseball was introduced as a major sport. As in most new things, when the prospects are none too bright, little interest was shown except by those at the head of the venture. Practice was started during March in the gymnasium with about thirty candidates reporting. Shortly afterwards the old American League ball grounds were obtained for the use of the team.

Before the season started, the outlook was indeed gloomy. None of the men had ever played college baseball before and most of them started the season with little experience and less confidence.

The opening game, though it ended in a 16-4 defeat for Northeastern, showed that there were hopes even for the first season. Northeastern registered twelve hits against Harvard's fifteen and, that we were not lacking in slugging is shown by Captain Rosenblatt's four hits out of five trips to the plate and Brown's three hits out of four times up. A pitching find was also unearthed, when "Slip" Ellms, who pitched the last five innings, held the Harvard artillery down to five runs. In order to do this, he had to strike out "Fish" Janin, the hero of the Yale game in 1920, and Captain Emmons — both of these with three men on bases.

The results of the 1921 season, our first one, were most satisfactory and the men who worked so hard to bring about those results cannot be praised too highly. The team did not win a majority of its games but it made a successful entrance into inter-collegiate baseball and the fact that every team on last year's schedule asked for a place on this year's schedule should afford some satisfaction to all those who are connected with, or are interested in the baseball team.

First Row — KELLEY, BLISS, ARATA, ROSENBLATT, Capt., MORGAN, ELLAIS, LAWLER Second Row — PORTER, Faculty Mgr., B. C. BROWN, NEWMAN, KNUEPFER, DAWE, ROBBINS, M. BROWN, Mgr.

The Team

ARTHUR DUFFEY	Coaeh
IRVING ROSENBLATT '22	Captain
Martin Brown '21	Manager
WARREN SPERL '22	Assistant Manage
Lindsay Elems	Pitcher
THEODORE BLISS	Pitcher
IRVING NEWMAN	Catcher
Theodore Bliss	Catcher
Claude Arrata	Catcher
John Lawler	1st Base
IRVING ROSENBLATT	2nd Base
Bernard Brown	2nd Base
Allen Dawe	3rd Base
Bertrand Robbins	Short Stop
STUART MORGAN	Short Stop
Thomas Kelley	Left Field
Charles Knuepfer	Center Field
STUART MORGAN	Right Field

Summary of the Season

Northeastern 4	Harvard 16	Cambridge	April 2
Northeastern 8	Tufts Dental 12	Boston	April 23
Northeastern 1	Norwich 10	Norwich	May 2
Northeastern 3	St. Michael's 3	Winooski	May 3
Northeastern 1	Norwich 6	Boston	May 11
Northeastern 3	R. I. State 6	Boston	May 16
Northeastern 11	Middlebury 7	Boston	May 21
Northeastern 2	Springfield 11	Riverside	June 4
Northeastern 7	Clark 2	Boston	June 11

1922 Baseball Season

Madison P. Jeffery Coach
Bertrand B. Robbins Captain
Warren L. Sperl Manager

Fifty eandidates for the baseball squad reported to Coach Jeffery in response to the first call for men and indoor practice was started in the gym. In addition to the entire last year's team, there are several newcomers who have been prominent on prep school and club teams.

Captain Robbins who is rated by many competent judges as the best college shortstop in the East, will fill one weak spot in last year's team, since his injured knee no longer troubles him. We have a strong pitching staff with Bliss and Ellms of last year's team, Cotter, a freshman who has already made a name for himself, and Smith, who held Harvard to six hits in the fall practice series. With Newman, Woodman, Huntington and MacCray all able to eatch a good game of ball there should be no worry from that department. Jones on third base, Ayles on second and Lehan on first seem to be the winning combination in the infield while a fast hard hitting outfield can be built up around Rosenblatt in center.

Track

Joseph W. Zeller

The track team was fortunate in securing the services of Joseph W. Zeller as a coach. Coach Zeller graduated from Tufts College in 1908, and, while at that institution, gained renown as a track athlete, competing against the leading stars of his day. He earned his letter at Tufts in the high and broad jumps, the pole vault and hurdles and established the Tufts high jump record which stands today.

In 1905, he was the New England Inter-collegiate champion high jumper. After a year's absence from the game he won third place in the 1907 New England Inter-collegiates. In 1908, he became indoor New England Inter-collegiate champion in the high jump, when he broke the record for that event.

After serving as assistant coach for the Claremont, N. H., High school track team in 1910, during which time that team won the state championship, he took charge of the high school team at Jacksonville, Florida. His charges not only won the state championship the last five of the eight years he was there but established records in eight of the fourteen events. Some of the most noteworthy of these are as follows: pole vault, 11 feet 3 inches; broad jump, 21 feet, 10 inches; high jump, 5 feet, $10\frac{1}{2}$ inches; and one mile run, 4 minutes, 45 seconds. He comes to us after coaching the University of Florida team.

Maurice WH. Goodridge

Coach Goodridge has had charge of the hurdlers during the past season and his progress with them has been remarkable. Last fall he started with only a small squad of men with absolutely no experience in that branch of the game. To date he has developed — through patience and hard work — several good men and has others on the way.

Mr. Goodridge is a graduate of M. I. T., 1919. He made his class track team at the Institute in 1915–16–17 and 18, and the varsity team in 1916–17 and 18. He won places in the New England Inter-collegiates in both the high and low hurdles.

Review of the Track Season 1921=1922

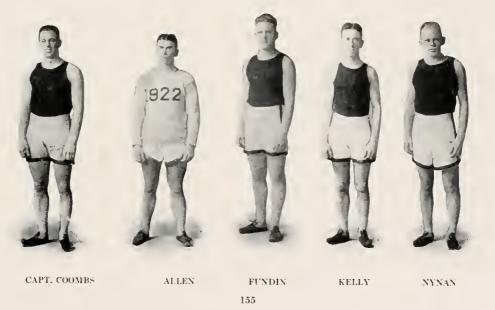

The first call for track candidates was issued shortly after school opened early in September and a squad of over one hundred sixty men reported. With practically all the winning 1921 team as a nucleus, Coach Zeller proceeded to round out a winning team. Coach Zeller took charge of the field events and distance men, while Mr. Goodridge coached the hurdlers and Captain Coombs, the sprinters. The 1921 team had been weak in the weights and high jump, so a great deal of attention was given to these events.

Freshmen-Sophomore Meet September 27

By winning the relay race, the Sophomores of Division A managed to nose out the Freshmen in a very exciting meet in the Samuel Johnson Gymnasium, the final score being 31–28. The work of "Bill" Parsons, the Sophomore "standby" and of Maurette, the former Medford High School speedster, stood out.

Cross Country Run November 10

E. N. Sampson, 1922, won the first cross-country run ever held at North-eastern over a two and one half mile course through the Fenway. C. I. Williams, 1922, was second, while S. O. Maxwell, 1925, captured third place by passing Brown, 1925, at the finish.

B. A. A. Games, February 4

In the B. A. A. Games the Northeastern Engineers were matched against the Woreester and Rensseller Polytechnie Institutes in the one mile relay. At the finish, Rennseller was ten yards in the lead with Northeastern an easy second, leading Worcester by twenty-five yards. Captain Coombs led off and gave Fundin a twenty-yard lead. Incidentally, Coombs' time for his quarter was fifty-three seconds. Fundin, though he fought gamely, was unable to hold this lead and fighting the Rensseller man on the turn, half stumbled and lost his stride. W. N. Parsons and Nyman ran in third and fourth places respectively.

Clark Meet, February 16

Northeastern walloped Clark University to the tune of 68-4 in a dual meet in Boston. Clarke was able to get four third places, thus escaping a shutout. Coombs was the star of the meet, winning the 45-yard dash, 300 yard run, broad jump and tying for first in the high jump. Sampson, Nyman, and Fundin,—who had by this time rounded into first class shape,—turned in fast times, though they were given very little competition. The freshmen entered in this meet showed up very well and scored fifteen points among themselves.

Worcester "Polly" Meet, February 22

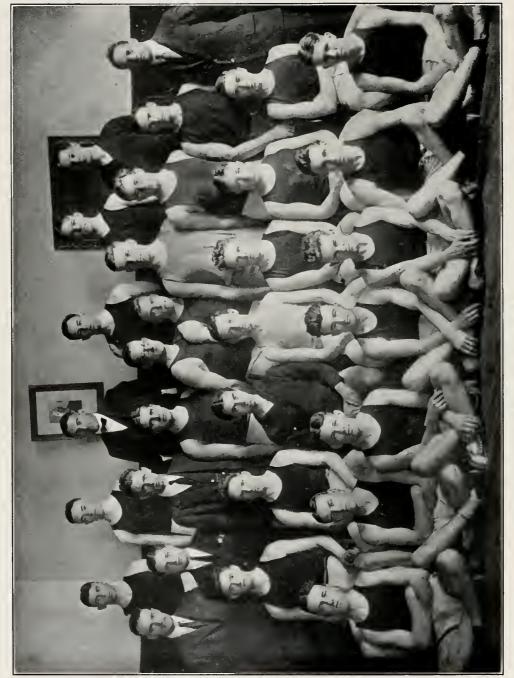

The track team celebrated Washington's Birthday by defeating Woreester 33 2-5-30 3-5 in a closely contested meet at Worcester's gymnasium. Fundin, Coombs, Nyman, and Sampson ran remarkable races considering the fact that the Worcester track was only half the size of our own. Had more events been run, Worcester would have been beaten much more decisively.

Basketball Season 1921=1922 Madison P. Jeffrey

Madison P, Jeffrey, Tufts '19, assumed the position of director of athletics in Northeastern College in the fall of 1921. Under his leadership, athletics took a decided brace and the teams produced compared favorably with the best in the East. In his college days he was an exceptionally good all-round athlete. He was captain of his freshman basketball and football teams. He was twice a member of the varsity football and baseball teams and was 147 pound wrestling champion of the college.

From the time Coach Jeffrey took charge of athletics, he has been a Northeastern man, heart and soul. He has always worked hard to win the games but before victories he has always placed clean athletics. Early in the season he said to one of his squads, "You must fight hard, give all you have; you will lose some skin and bruise your muscles but you must play clean." That his policies have worked out well, is evidenced by the prompt invitations of the opposing teams for future games.

"Bob" Dunbar, formerly of the "Boston Journal," paid Coach Jeffrey a fitting tribute when, in February, 1916, he wrote in that paper, "Madison P. Jeffrey, Tufts '19, a varsity football player of last fall and a strong aspirant for baseball backstopping honors, in spite of his all-round athletic ability, does not confine himself to the athletic field alone for Tufts varsity honors, but has made the Brown and Blue varsity debating team against Bates."

Review of the Season 1921-1922

The team this year showed a decided improvement over that of last year in all departments of the game. Coach Jeffrey's problem was to break up the individual play which was characteristic of last year's team and to get the whole team working as a unit. All this took time but by mid-season results were forthcoming and the team showed a great improvement. Of the six home games, Northeastern won four and some of the games away from home were lost by only one or two point margins. We may feel justly proud of the team for the hard fight they made against the strong Crescent A. C. team in New York. Although on the losing end, Northeastern scored more points against the Crescents on their floor than Dartmouth scored against them in Hanover. By way of comparison between the team at the first of the season and the last we might take the Norwich games. Early in the season Norwich was on the long end of a 35–22 score. In the last game of the season Northeastern defeated Norwich 32–9, Norwich being able to score only three goals from the floor, so thoroughly did our defence function.

Prospects for next season seem bright with the spirit of team play now a part of the men and with a strong freshman team from which to draw players to take the place of those lost through graduation.

ORCHESTRA

The Orchestra has had a very representative group of men this year. There are men from each class who have successfully met the competition. Mr. N. T. Goulet, a member of the senior class, undertook to direct this organization with very excellent results. The most impressive appearance was at the Round-Up where very fine ensemble work showed the earnestness of all members.

The credit for this organization is due to Laverne Bushnell, who with the hearty support of Professor Spear, the officers and members of the Band, has made it an institution of which the School may well be proud.

The list of performances is large, including mass meetings; track meets; Jubilee; Mid-Winter Social; Field Day; Round-Up and several other functions which are too numerous to mention.

The present line up of "Blowers" is:

The Glee Club

The Glee Club, like its affiliated musical organizations in the School of Engineering, has been a decided success during the past year. Starting with a small nucleus, it has rapidly grown to its present high standard, both in numbers and in quality. Under the efficient leadership of W. W. Allan, it has offered many varied and entertaining programs at school functions and also at outside social events. Within the last year it has appeared at the Mid-Winter social, the Spring Carnival, the Round-Up, and several Mass Meetings together with special performances at the Y. M. C. A. concerts and socials.

BURKE LEAVITT

HOLLAND PETERSON

The Banjo Club

The Banjo Club of Northeastern College is still in its infancy as far as age is concerned, but from the point of experience it is a great deal older. It was started last year by a few ambitious spirits, and has steadily grown until it has now become an important organization and has reached the stage where very excellent work has been accomplished.

Last year it gave its first performance at the gym social as a part of the regular school orchestra. This year, owing to the increase in size, it has become a separate organization of its own. Practically all of the activities last year were devoted to playing with the orchestra at mass meetings.

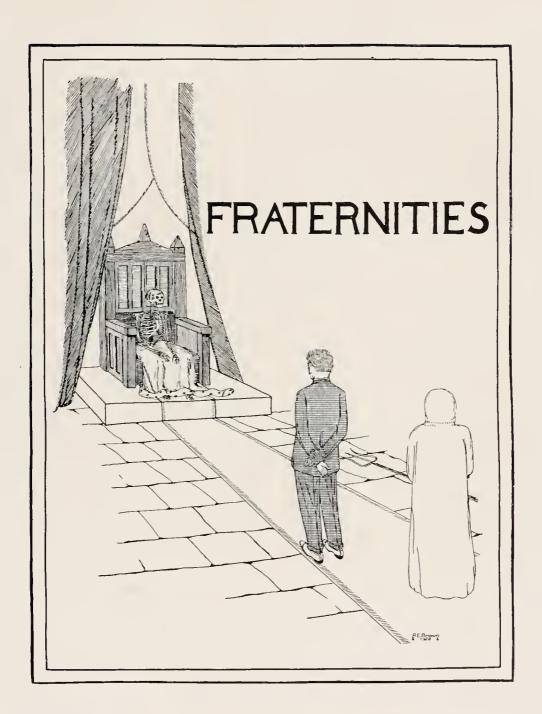

This year, however, the scope of the banjo club has been increased considerably. It has played at dances, at a smoker of the Evening Polytechnic School and rendered a considerable part of the program of the Annual Spring Round-Up. It has been appreciated on every appearance with increasing favor.

The Checker Champ

The Toughest Marker

PROF. STRAHAN

PROF. COOLIDGE

The most popular member of the office force.—Swasey first, with Painey and Penny tied for second.

Our Personals

This is our:.

War Record

Ours seems an enviable record. Though some admit being in the regular army, most of the boys fought with our tennis court unit and the Salvation Army. One man claims to have participated in the battle of Huntington Avc., a memorable engagement, while our own Sergeant York, claims a thousand hens.

Our Attitude on War

It seems to be an undisputed fact that Sherman was right and that war is great stuff for the movies, but not for civilization.

Preferred Home-Brew

Recipes too numerous to mention, as well as specific concoctions, such as, grape juice, hair tonic, cider and buttermilk.

Recreation

Jazz stuff seems most popular though sleeping comes a close second while sifting ashes, watching the office girls trail through the lobby, grinding and strolling, have their places in the curriculum of our lives.

Pet Expressions

"Kiss me, I've got to go now," takes the old derby, while others, such as "When do we cat?" "Oh! Fudge," and "Did you make' em, Al?" are examples from our vocabulary.

Favorite Hang-Out

According to reports half the class spend three quarters of their time on the corner of Boylston and Tremont Streets. The Fenway, City Point and other points of interest throughout the city claim their portion, however. It is surprising that these boys manage to do any studying at all.

Plans for the Future

Getting married seems most popular, living on the old man, doing nothing or as little as possible, running for mayor, digging ditches and driving taxies are other happy thoughts.

Idea of Reading Matter

"Capt. Billy" is the most popular, though "Snappy Stories," "Vanity Fair," and "Hydraulic Motors" have their following.

Favorite Indoor Sport

Ping-pong is the real game, though the more reckless prefer to follow the "Galloping dominoes" with "put and take" on the side.

Destination After Termination of Our Relations with this Earth

One man, and only one, expects to find himself on Mars, but the rest seem to think that we will be holding our class meetings in that place where asbestos suits are in vogue.

Favorite Girls School

The "Con" leads, but Simmons swings a mean rolling pin in second. Harvard, Smith and Wellesley trail the first two.

This is **Ulhat**

We are going to do with our first Million. Spend it in buying a second. Corner the air traffic. Buy seed for destitute canaries and buy an up-to-date Ford with all fixtures.

We Consider Our Ambition

99.2-3 e_0 voted a large family, as the highest ambition of our lives. The other 1-3 of 1^{e_0} wanted to build a bridge across the Atlantic. Where is the romance in some people?

Do Pou Know That

14 3-27 $^{o_{\ell}}$ of the class are married, though some admit their marriage not legal and the rest claim insanity or wood alcoholism as the cause of their downfall?

28 14-27% of the class are not married, but expect to be by the end of 1922?

57 9-27% of the class declare that life is too sweet and too short to take any chances with matriniony?

1-27% of the class decline to discuss the subject?

About 90% of the class claim a steady, though only 30% of these steadies know that they are steady. One knows it when she's sober, but the rest of the 60% don't seem to realize the fact.

That 87 3-5 $\frac{c_7}{c}$ of the class smoke? That they smoke anything they can borrow and when they can't borrow they don't smoke?

That 42% of the class own cars and that the models run from 1890 up to 1930? The old "Fliv" is the most popular though the Derby Racer doesn't take all of the dust?

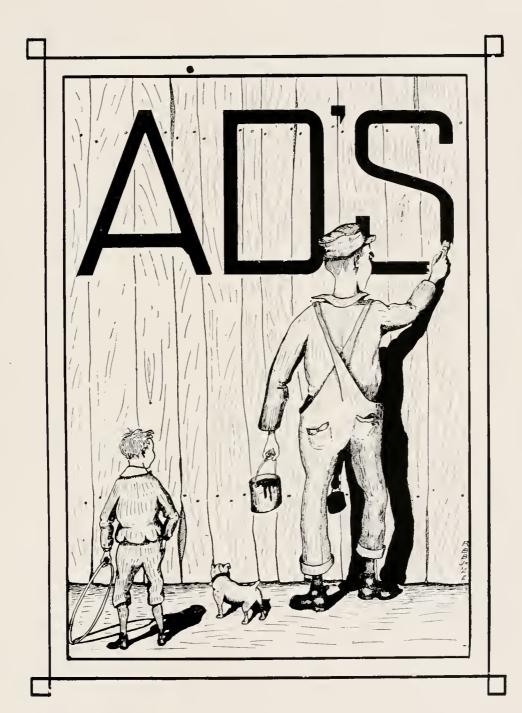

The average number of crimes each man has committed during the average life of the class, 2t years, 7 months, 23 days, 4 hours, 36 minutes and 58 3-5 seconds, is 22.479? One man claims 10⁻⁵ as his share while another cries for an adding machine, so you can readily understand, ours is no "idle" class.

87% of the class expects to be at Riverside for Field-day on the sixth of June in 1922?

That the only reason that the other 13% will not be there is because they both expect to be in China?

SWIMMING POOL

WORTH WHILE NEWS

Are you one who buys a paper for its comic strips, or do you want the news of the world placed before you in the proper perspective?

If you are seeking the latter, form the **Boston Transcript** habit now, and grow up with it. It will appeal to you today for its School and Sporting News. It will appeal to you tomorrow for its Business, Financial and All-round News.

- READ THE -

Boston Evening Transcript

Sperl: "When I took this room, you told me there was a single hair mattress on the bed."

LANDLADY: "Yes, so I did."

Sperl: "Well, will you please come here and show me the single hair?"

Mr. Porter: "Tell me again, dear. Why did you marry me?"

Mrs. Porter: "That's what everybody asks me."

Mrs. Ell: "Yes, he ate a Welsh Rarebit."

Northeastern University

DAY SCHOOLS

SCHOOL OF ENGINEERING

Four-year courses in Civil, Mechanical, Electrical, Chemical, and Administrative Engineering, leading to the degrees of Bachelor of Civil, Mechanical, Electrical, and Chemical Engineering. The school is conducted in co-operation with engineering firms. Students earn while learning. Open to high school graduates. Work conducted at Boston.

SCHOOL OF BUSINESS ADMINISTRATION

Four-year course in Business Administration leading to the degree of Bachelor of Commercial Science. Students may specialize in Industrial Management, Marketing, Finance, and Accounting. A two-year course leading to the Certificate of Proficiency is also offered. Open to high school graduates. Work conducted at Boston.

EVENING SCHOOLS

SCHOOL OF LAW

(Co-Educational)

Four-year course leading to the degree of Bachelor of Laws. Case method of instruction. High scholastic standards of scholarship. Open to high school graduates or those with equivalent education. A limited number of men and women of maturity and experience admitted each year as special students, not candidates for the LL.B. degree. Work conducted at Boston, and in Divisions at Worcester, Springfield, and Providence.

SCHOOL OF COMMERCE AND FINANCE

(Co-Educational)

Four-year courses in Professional Accounting and Business Administration leading to the degrees of Bachelor and Master of Commercial Science. Special two-year courses for students who desire to specialize in a particular field. Open to high school graduates or those with equivalent education. Work conducted at Boston, and in the Divisions and Branches at Worcester, Springfield, Providence, Bridgeport, New Haven, Lynn, Cambridge, Malden, and Newton.

EVENING POLYTECHNIC SCHOOL

Three-year courses in Civil, Mechanical, Electrical, Chemical, Structural, Industrial, and Automotive Engineering leading to a diploma The school trains men for positions of trust and responsibility. Work conducted at Boston, and in the Divisions at Worcester, Springfield, New Haven, and Bridgeport. (The school in Worcester is known as the "Evening School of Applied Science.")

NORTHEASTERN PREPARATORY SCHOOL

Courses in usual high school subjects leading to a diploma. Three sixteen-week terms each year. It is possible for students to meet college-entrance requirements in from three to five years. Work conducted at Boston and in Divisions at Worcester and New Haven.

VOCATIONAL INSTITUTE

A diversified program of short intensive courses including all phases of the Automotive industry with special instruction for owners, salesmen, mechanics, and chauffeurs.

DEPARTMENT OF UNIVERSITY EXTENSION

Home Study courses in co-operation with the United Y. M. C. A. Schools. Classes in public speaking, salesmanship, accounting, economics, and other subjects organized and lectures conducted in cities and towns throughout New England. Classes for employees conducted in co-operation with leading corporations and business concerns.

The other night on Columbus avenue a negro patrolman accosted a little brown man with a little brown jug.

"What you-all got there, boy?" he asked. "Ain't corn, is it?

"Tain't hay," said the little man sullenly.

A moment later they were on their way to the "box."

"Where's this you takin' me, big boy?" he asked. "Ain't jail, is it?"

"Tain't church," replied the copper.

ROSENBLATT (at the state house): "Is it all right to go into the Hall of Flags?"

Guard: "Yes, sir. Shall I show you about?"

Rosenblatt: "Oh, don't bother. I used to be governor here once."

Twenty-seven years at

96 Court Street, Boston, Mass.

During the war "Charlie" Williams was working at Fore River. One day he was seated on the dock near a ship which had just been launched. A near sighted old lady came up and said, "Oh, excuse me! Are you the captain of this ship?"

Charlie came back, "Cap'n? No ma'm. You see, the government just bought ten vessels like this one. Well—I'm the lord high admiral of the fleet."

It has got so that the definition for a stadium is "a large ball field with a college attached."

Alves: "What's the matter, Prof? Lame leg?"

Prof. P-: "No, Boot-leg."

Bradbury: "How long should a modest woman wear her skirts?"

Coombs: "Until bed time."

NYMAN: "How do you like that skirt goin' down the avenue—some short what?"

Parsons: "Yes, just right, just above reproach."
